High-Capacity Class A Dosing System

TRITON PLUS is a high-performance dosing system developed for vehicle-mounted firefighting applications requiring higher foam or wetting-agent delivery.

Designed for integration with existing water circuits, the system combines controlled dosing, water-flow measurement and electric pump operation in a compact configuration suitable for fire and rescue vehicles.

Key Features

	BP
Pump flow range	0,2 to 15 lpm
Pump type	Piston
Suction	-0,15 bar
Pressure	12 bar
Dosing range*	0,1 à 1%
Water flow range*	DN40 : 35 to 850 lpm
Power	Electric 24V - 45A
Compatibilité produit	Newtonian
Priming	Manual
